"This sweet yellow nectar is vibrant and bursting with ripe fruit flavors."

-Flint Nelson, Winemaker

Notes from the Winemaker:

This sweet yellow nectar is vibrant and bursting with flavors such as: apricot preserves, clover honey, baking spices, golden raisins, caramelized sugar and honeysuckle. On the palate the wine is full bodied and lingers for minutes. You will wonder how anything could be so deliciously decadent.

In 2014 we experienced cold temperatures in November which froze the grapes solid on the vines. It was our golden opportunity to produce Ice Wine. We were able to pick and press the grapes without any chance of thawing. Conditions are only right to harvest ice wine when the temperature is below 17 degrees Fahrenheit and the fruit remains frozen until pressed. Ice wine is not something that we can produce every year. If the extreme cold doesn't come, or the birds beat you to it, all is lost.
